

KB-0070-Disable & Enable Snapshot Timestamps

GENERAL

Distribution	OEM/Partner/Distributor	Installer	Customer
	YES	YES	YES
Last Update	24-03-2009		
Product	WebCCTV, GuardNVR		
Version	4.1.1.0 or higher.		

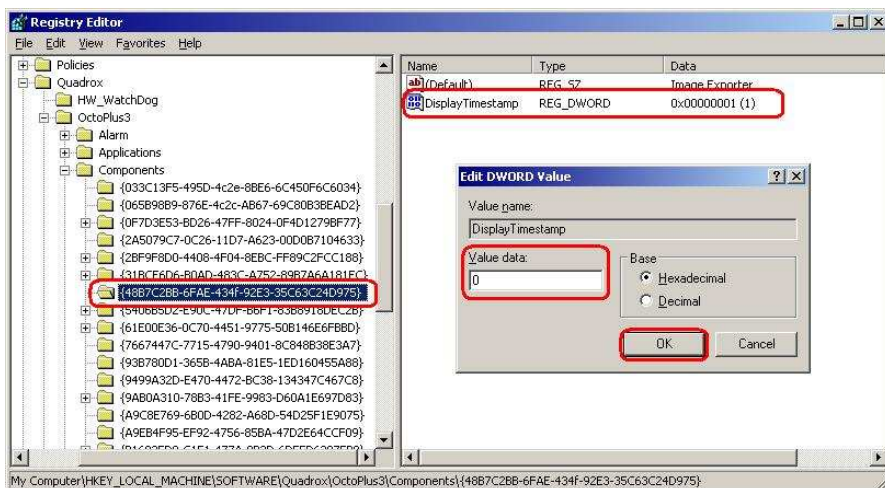

DESCRIPTION

By default timestamps are shown on snapshots taken in the web application starting from version 4.1.1.0. However it's possible to disable this feature if desired. This article describes how to do this.

SOLUTION

In order to disable timestamps, perform the steps below:

- **Stop Video Server.**
- Go to **Start** → **Run...** → **cmd**. Type **regedit** and **enter**. Locate the following registry key:
HKEY_LOCAL_MACHINE\SOFTWARE\Quadrox\OctoPlus3\Components\{48B7C2BB-6FAE-434f-92E3-35C63C24D975}
- Right click on **'DisplayTimestamp'** in the right pane and select **Modify**.
- Change the field **Value data** to **0** and click **OK**. (Enable Timestamps → Value Data = 1).

- **Start Video Server.**

Timestamps are now disabled for snapshots.
